

CREATIVE DESIGNER

NIKHILINDU

Hi, I'm Nihindu Nethmira. I am a graphic designer and IT student who loves turning complex problems into elegant, user-centric digital solutions, effectively bridging the gap between creative visual storytelling and structured frontend development. My design philosophy is deeply rooted in minimalism, high-contrast aesthetics, and purposeful user experiences. Whether I'm building an e-commerce platform from scratch, designing a cinematic portfolio, or shaping a brand's visual identity, I focus on delivering clean layouts, smooth interactions, and robust functionality that truly stands out.
